PROJECTS

Online School Management System(OSMS)

Description: Developed a comprehensive system for managing school operations, including student enrollment, attendance, and grading.

Technologies Used: Java, Spring, MySQL, HTML, CSS

Role: Lead Developer

Outcome: Improved the efficiency of school management operations, reducing administrative workload by 20%.

Automated Teller Machine(ATM)

Description: The ATM system is designed to provide banking services to customers 24/7. The system ensures user authentication, transaction processing, and account management in real-time.

Technologies Used: Java, Spring, MySQL, HTML, CSS, Spring, SpringBot, Jsp.

Role: Lead Developer

Outcome: The primary goal of this project is to develop a robust and user-friendly Automated Teller Machine (ATM) system that allows users to perform financial transactions with ease and security
